

Jhia Turner

Software Developer

Seattle, WA | jhimitu@gmail.com | 720.381.7542
[linkedin.com/in/jhiaturner/](https://www.linkedin.com/in/jhiaturner/) | github.com/jhimitu

Software engineer with a strong background in Javascript, React, functional programming, RESTful APIs, Git, and responsive design.

Technical Skills

Languages: JavaScript(ES6), CSS, HTML

JS Frameworks: React, Angular, BackBone, JQuery

Tools: Webpack, Git, Mocha, Chai

Projects

ToneDev | October 2018 | Github

- Built a microservice that leveraged the IBM Watson api to analyze and calculate sentiment scores of github code reviews and stackoverflow comments
- Composed client-side components that reach out to microservices through an API Gateway to render sentiment analysis data

BackPacker | September 2018 | Github

- Worked with an inherited code base to improve functionality of the existing app
- Improved UX by centralizing weather & alerts components in a convenient dashboard view

CookBük | August 2018 | Github

- Used Artyom.js to create a voice controlled kitchen assistant that audibly delivers recipe instructions to the user, creating a mostly hands-free UX
- Created user flow diagram, designed wireframes and used CSS to style application

Education

Hack Reactor | Remote

Advanced Software Engineering Immersive | 2018

Metropolitan State University of Denver | Denver, CO

B.Sc., Sustainable Systems Technology | 2016

Community College of Aurora | Aurora, CO

Associate of Arts | 2011

Related Professional Experience

Bethel International, Inc. | Webmaster | Fayetteville, NC | October 2017 – March 2018

- Used JavaScript to add a chatbot to the website, bringing staff response times of customer inquiries from down from 1-2 days to 24 hours or less
- Led the design of print catalog for 2018 floor show events
